

Why not become a BGA Corporate Member?

The BGA was formed in June 2000 following the merger of the British Geotechnical Society and the ICE Ground Board. The BGA serves the geotechnical and geoenvironmental community, which is one of the most active and vibrant within civil engineering.

But what does the actually BGA do? The BGA organises meetings and events including:

- The renowned Rankine Lecture.
- Evening technical discussion meetings.
- The Touring Lecture.
- The Cooling Prize for young geotechnical engineers.
- The BGA Annual Conference, a free 1 day conference for BGA members.

The BGA also acts as a learned society and a professional body, working to champion technical and professional issues. This includes the running of a number of prizes and the current initiative on Registration of Ground Engineering Professionals.

Your company or research group can support the BGA in these activities and the geotechnical community at large by becoming a corporate member. Member benefits include:

- Company or research group link from the BGA website, www.britishgeotech.org.uk.
- Two free copies of Ground Engineering each month.
- Subsidised geotechnical journals – subscribe to Geotechnique, Geotechnical Engineering and Ground Improvement and save over £500.
- Discounted entry for two staff members at BGA sponsored conferences.
- One staff member nominated as BGA contact.

2012 corporate membership is £270 for UK based members. Please see the application form for full details.
